

m-s *endur*^{II}

The True Long-Life Battery™

Generate Savings, Not Waste

The msEndur II valve regulated battery is the environmentally friendly battery that saves you money in normal operation.

The same low float current that ensures a twenty-year life, is good for the environment and saves money

100% Recyclable

- Cadmium free
- Lead, plastic and sulfuric acid can be recycled and reused

Environmentally Friendly

- Up to 75% lower float current
- Consumes up to 75% less electricity
- Lower float current generates less heat
- Less heat generated reduces requirement for air conditioning
- Less electricity consumed in float charging and air conditioning, reduces carbon emissions

Power Solutions

Operational Cost Savings

- The highly efficient *msEndur II* consumes 200KW less power every year than a typical 48V 2000Ah battery
- The *msEndur II* would save even more energy than a standard 750KVA UPS battery at over 2MW per year
- Over a twenty year life the *msEndur II* product you could save:
 - ✓ \$400,000 for every 1000 strings of 48V 2000Ah Telecom batteries or
 - ✓ \$400,000 for every 100 sets of 750KVA UPS batteries
- Over \$1 Million dollars of saving is achieved through the elimination of extra air conditioning costs due to the lower heat generation of the *msEndur II* during operation
- If the rest of the equipment in your cell site, central office or data center can handle it, increase the battery room temperature to 86°F and save even more on your cooling bill ... the *msEndur II* can take it!

Save up to 75%

Standard VRLA msEndurII

ENERGY STAR qualified bulbs use about 75 percent less energy than standard incandescent bulbs and last up to 10 times longer.

Now imagine a battery that can do all that and more for your operations.
